GitHub Link : https://github.com/pRaV33N-S/SQL_Practice/tree/master/School

Step 1 : I created a master page using webforms.

Step 2 : Then created Student.aspx, Course.aspx and Teacher.aspx webforms with school master page

Step 3 : I created hyperlinks to redirect to the respected page when a button in the nav bar is clicked

Step 4 : I created a connection between database to display the datas which I created for this project.

Step 5 : End of the program.
